

Invoice Automation Pilot: score any vendor on your own invoices in 30 days

Field accuracy is a software number. Touchless rate is a business number. Only the second cuts cost.

THE 30-DAY PLAN

Week 1 Pull 300 real invoices: top suppliers, scans, multi-page invoices, credit notes.

Week 2 Key the right values once by hand. Score each tool field by field.

Week 3 Run matching against real POs and receipts. Count invoices that post untouched.

Week 4 Tag every stopped invoice by cause. Ask for a price per processed invoice.

SCORECARD (ONE COLUMN PER VENDOR)

	Vendor A	Vendor B	Vendor C
Field accuracy, clean PDFs (%)			
Field accuracy, scans (%)			
Invoices with zero field errors (%)			
Touchless rate after matching (%)			
Exceptions: reading errors (%)			
Exceptions: PO / receipt mismatch (%)			
Exceptions: supplier data (%)			
Exceptions: approvals (%)			
Price per processed invoice, all fees (\$)			
Confidence scores per field? (Y/N)			
Bank-detail changes blocked? (Y/N)			
ERP connector included? (Y/N)			

BENCHMARKS TO COMPARE AGAINST

Touchless rate: 32.6% average, 49.2% best-in-class. Cost per invoice: \$9.40 average, \$2.78 best-in-class.

Source: Ardent Partners, AP Metrics That Matter in 2025 (212 AP and finance leaders).

Rule of thumb: at 98% per field, only about 67% of 20-field invoices come out error-free (0.98^{20}).

Send us 50 anonymised invoices and we will estimate your touchless rate.
